

### **AMENDMENTS TO THE DRAWINGS**

Applicants submit herewith replacement drawing sheet for FIG. 6 for the present application in response to Examiner's objection to the drawings under 37 C.F.R. 1.83(a). The Examiner objected to Applicant's drawings because the drawings, according to the Examiner, do not show every feature of the invention specified in the claims. In particular, the Examiner noted that the term "dynamically," as recited by Applicant's claims, does not appear in the drawings. To overcome this objection, Applicant has amended FIG. 6 in the manner shown in the attached replacement sheet.

Specifically, Applicant has amended FIG. 6 such that step 86 reads "dynamically determine next time epoch based on system load." Applicant submits that by amending FIG. 6 in this manner, the limitation "dynamically determining a time epoch based on the loading condition," as recited by the claims, is shown in FIG. 6. Moreover, the limitation "transferring, at the dynamically determined time epoch" is also shown in the claims, as step 80 of FIG. 6 refers to the "time epoch" which step 86 shows as being "dynamically" determined. According, by amending FIG. 6, the requirements of 37 C.F.R. 1.83(a) are satisfied inasmuch that the drawings show every feature of the invention specified in the claims. In view of this amendment, withdrawal of the objection is requested.
